product overview

comp

We are an international producer of semi-automatic espresso machines, based in Milan, Italy. Our daily business is focused on delivering the most simple, intuitive and highest quality solutions for every individual coffee concept.

Today we represent our »proof of taste« in almost 50 countries all over the world and share knowledge and passion with our international community.

In 2001 Bruno and his son Paolo founded Dalla Corte s.r.l. and developed the groundbreaking dc multi boiler technology. With permanently setting new standards in the global marketplace we succeeded in becoming the driver of innovation for an entire sector.

2006
Introduction of the GCS (Grinder Control System). The first fully automatic control system between machine and grinder.

2004
Start of the international sales activities promoting the „Proof of Taste".

2003
The first version of the OCS (Online Control System) is developed.

2001
Dalla Corte S.r.l. is founded and the Evolution – the first espresso coffee machine, working with the dc multi boiler technology – was created.

1969
Bruno Dalla Corte develops the steam exchange heating system for the espresso coffee machine called „La Spaziale".

1959
Bruno Dalla Corte attends the development of the legendary system E61.

hist

pany

2008
The international sales network reaches 50 markets.

2009
Launch of the dc pro - Dalla Corte´s design piece, which is setting new standards in the field of semi-automatic espresso machines.

2011
Launch of the dc one (grind-on-demand) grinder.

2012
dc system (GCS-MCS-OCS) completes the Dalla Corte philosophy: aiming for the easiest solution, able to offer the best possible result in the cup.

2013
launch of the evo2: all new - still classic.

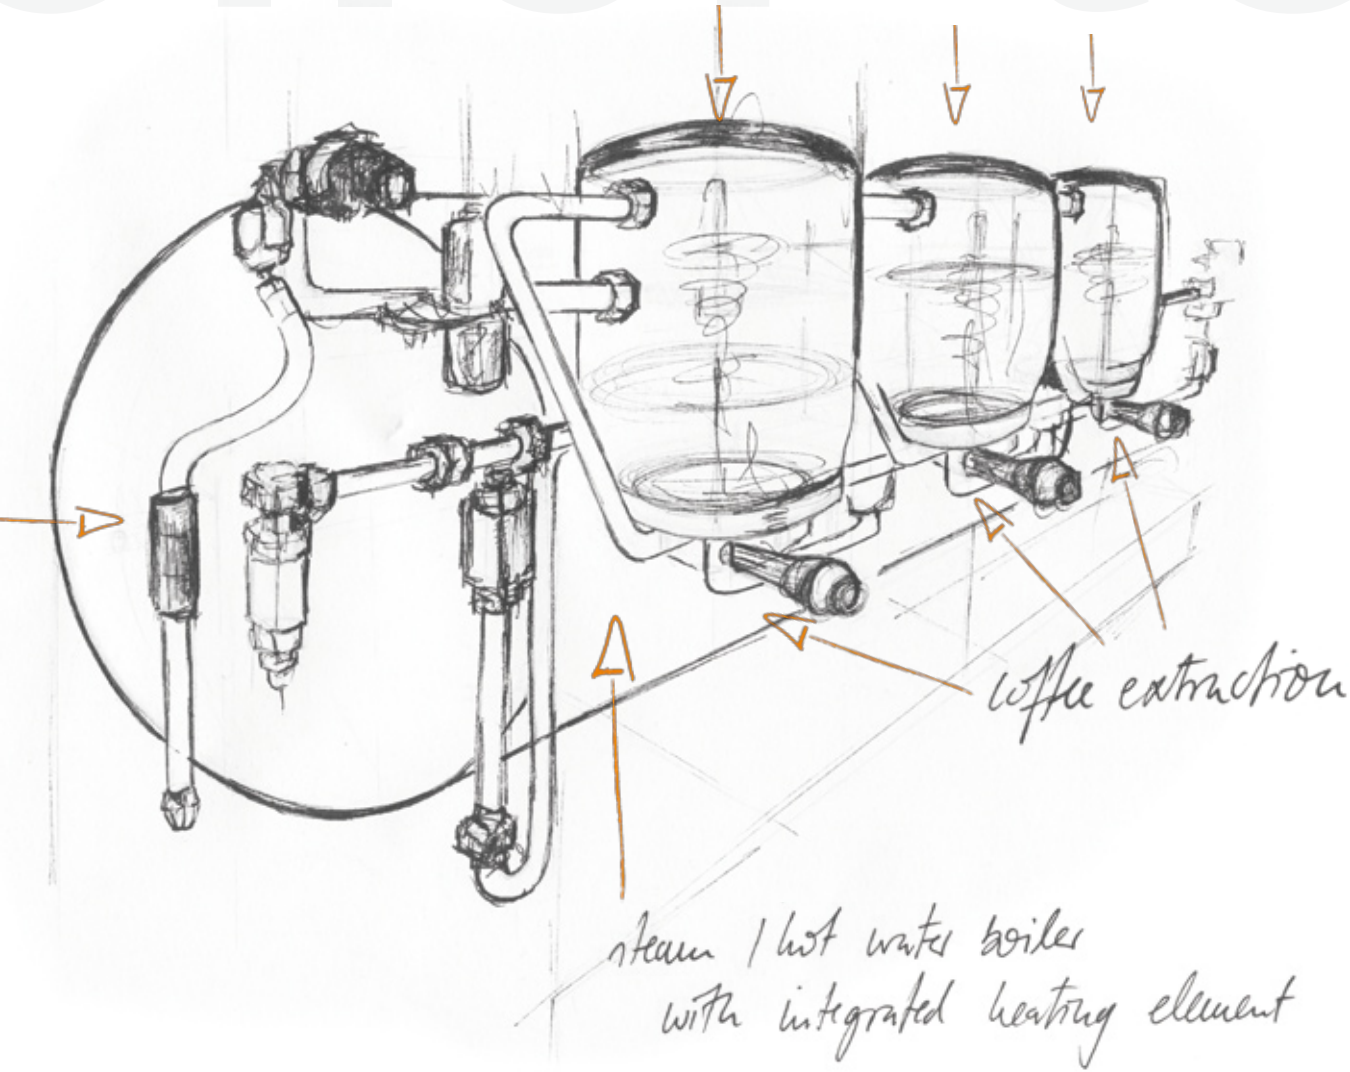
steam

Our invention – revolutionising the whole industry

In 2001 we created the dc multi boiler technology - our patented basic technology, which is fundamental for the **proof of taste.**



each brewing unit with integrated heating element
temperature probe in each brewing unit
coffee extraction
steam / hot water boiler
with integrated heating element

proof of taste

We succeeded in becoming a driver of innovation for an entire sector, permanently setting new standards in the global market place.

the only truth of excellence

Day by day we strive after perfection. Our goal is to help everyone to turn their individual coffee concept into reality, in simplest and best possible way.

Our passion is to deliver high quality solutions for every individual coffee concept – without compromises – day by day, cup by cup.

We are deeply concerned to be transparent and passion, knowledge and inspiring moments with our community, including almost 50 countries all over the world.

Working with dc products enables every user to produce perfect espresso in a very simple and intuitive way.

Our experience goes back to the 1950's when Bruno Cortese started to work in the coffee industry. This was the first step on our way to invent high quality solutions.

To grow in a healthy and sustainable way we and support green projects which protect our valuable habitat.

mainly use recyclable materials

dalla corte

dc pro design piece

Form meets function - this is the basis on which the dc pro was designed.

FORM - an unique, essential, elegant and ergonomic design piece obtained by combining high quality materials.

FUNCTION - leading-edge technology, practical and intuitive.

FORM meets FUNCTION - allowing the user to work intuitively and ensuring the highest level of quality – cup by cup.

evo2

The evo2 - our new model. A concentration of continuity, stylistic and technical innovation, based on more than ten-years of experience.

An espresso machine that marks a strong generational leap and sets, once again, standards thanks to its high technological features and great functionality.

dalla corte

all new – still classic

evo2

Innovation, continuity, style: our classic model, the Evolution, underwent a complete makeover which generated our new model, the evo2.

dalla corte mini

our smallest

mini | super mini

The mini and super mini have the same basis as our professional machines: the dc multi boiler technology. The brewing unit is separated from the boiler and is the same as used for the evo2 and the dc pro.

The mini is designed for private use and offices, the super mini for locations, where limited space is given.
Both machines offer the possibility to discover the full potential of an espresso blend: the brewing temperature can be regulated to whatever degree you like.

super mini

grind on demand

dalla corte

dc one

dc one

The dc one has been designed to ensure quality cup by cup, thanks to its unique features specially suited for the espresso preparation.

The simple and intuitive functioning, the flat bars expressly designed to obtain the perfect „cut“ of the bean, the automatic recognition between single and double shot, the display that facilitates the definition of the settings and the cooling system that does not allow any heating of the ground coffee are the basic features that guarantee a perfect grinding.

It works excellently as a stand-alone grinder as well as linked to one of our espresso coffee machines via the GCS - Grinder Control System, which controls and regulates automatically the grinding.

dc II

The compact dc II grind-on-demand double grinder is the first designed by Dalla Corte. The burrs have been studied appositely for the espresso preparation, to guarantee the best results in the cup. It works excellently as a stand-alone grinder as well as a dc system grinder connected to an evo2 or to a dc pro espresso machine via the GCS - Grinder Control System. The two bean hoppers allow to have always two different coffees ready and perfectly set for use and all settings may be effected electronically.

dc II

dc system.

dc system

The dc system is the natural development of our mission: We want to offer the best result in the cup, a result that has to be constant and repeatable over time.

The dc system is an unique interaction between our software-based system features (GCS, OCS, MCS). Those technologies are freely selectable and combinable with each other, depending on costumers‘ needs. A carefully choosen compilation guarantees the perfect solution for every single coffee concept. More information about the possibilities and benefits of the dc system are available on our website www.dallacorte.com.

gre

As our philospophy is based on a global but sustainable approach, we are convinced of a holistic high quality coffee concept.

That does not only include our technology but also fair traded specialty-coffee. This inevitably leads to a social responsibility for the people that live from coffee cultivation and the animals´natural habitat. This is why we support the unique Orang Utan Coffee Project in a way that helps to encourage the farmers understanding for coffee and with this the basis for sustainable agriculture. Hence not only the current living conditions for the farmers and their families are improved but also their long-term perspective.

Thus we provide equipment such as machines, grinders and roasting kit for the training center Orang Utan Coffee Lab in Medan. Additionally coffee courses with our dc coffee pros will be arranged on a regular base.

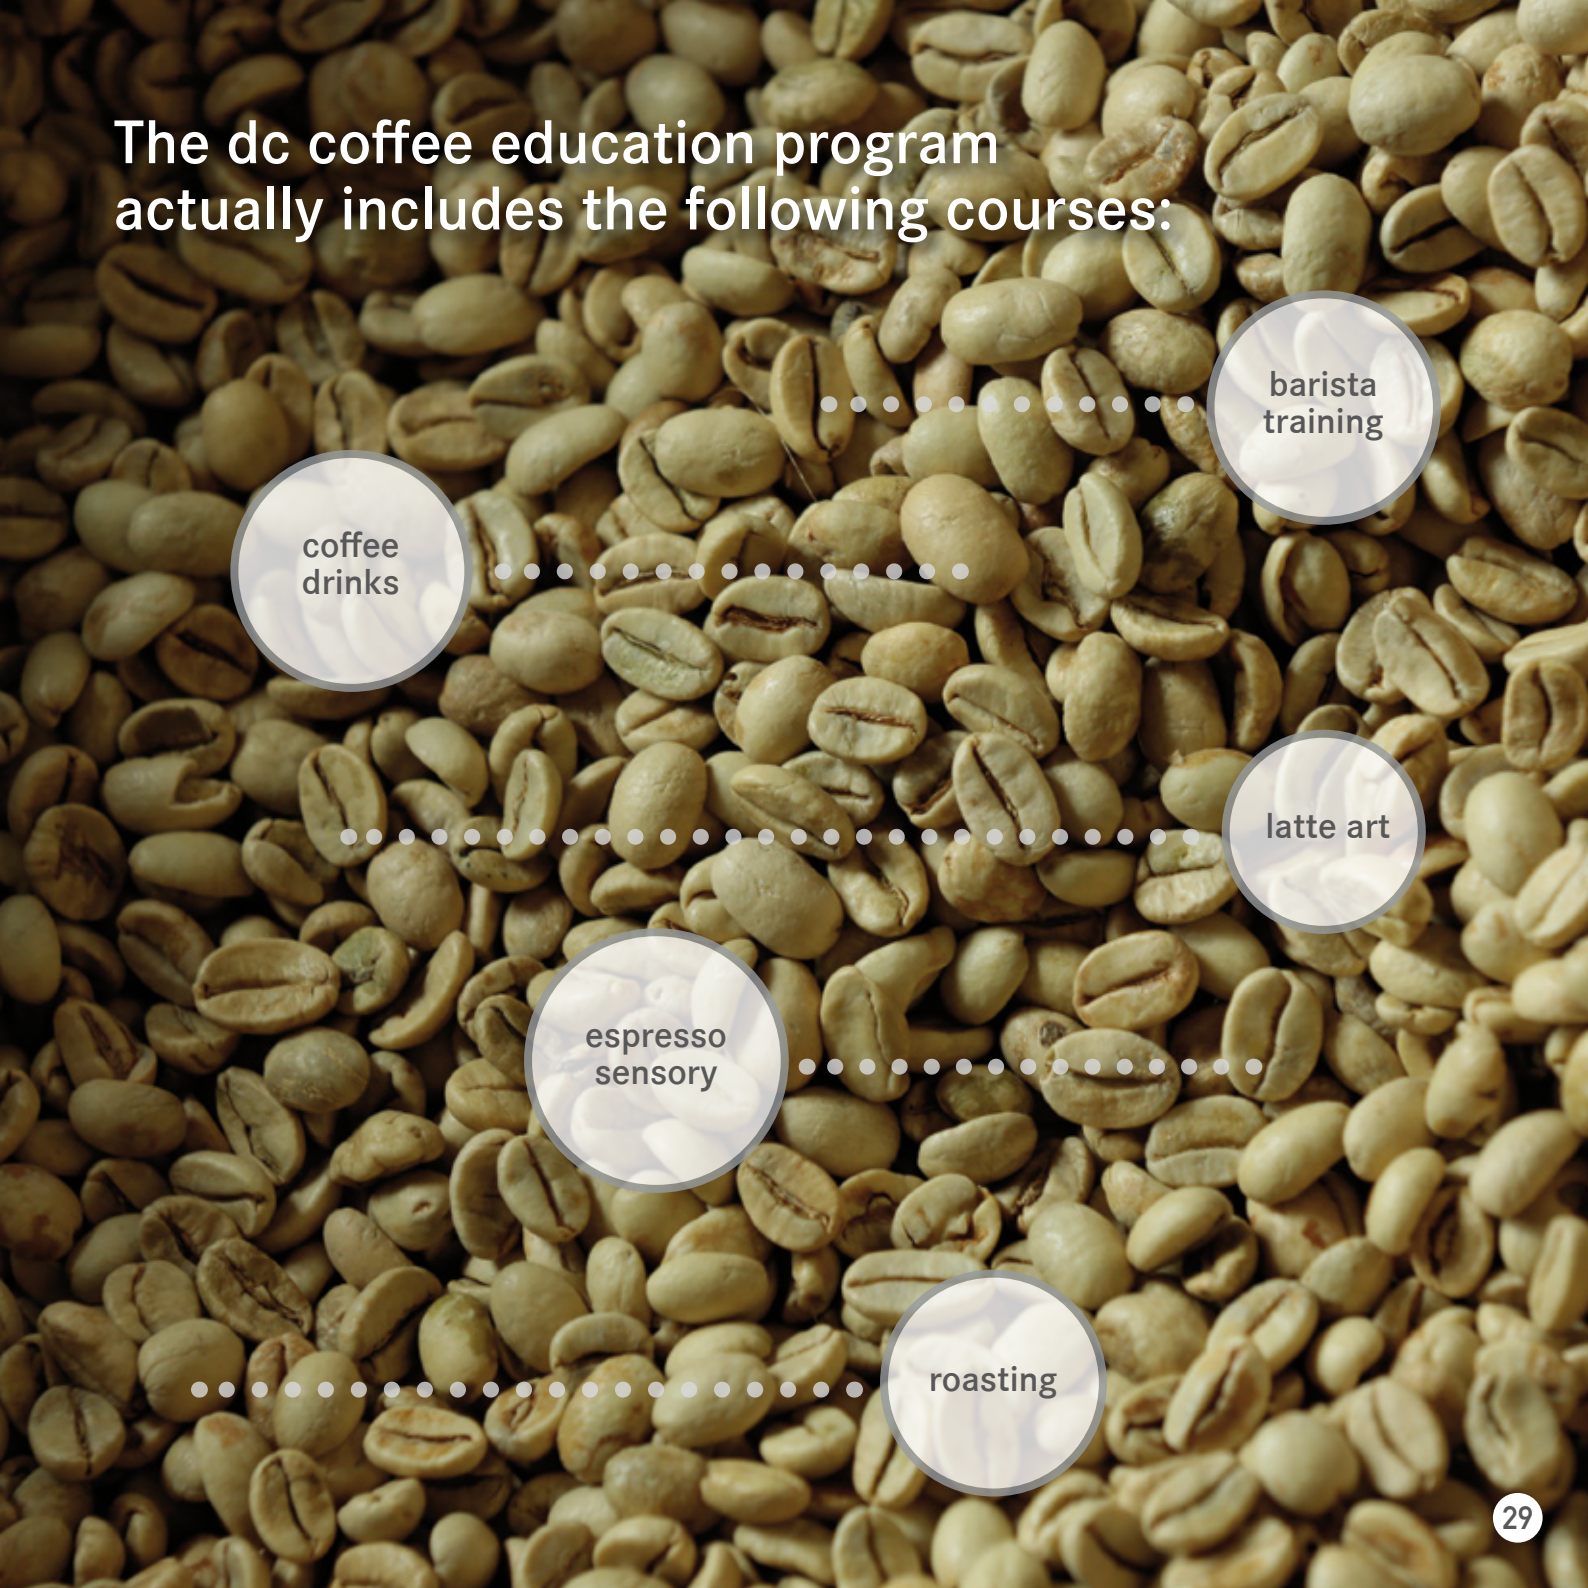
coffee education

Our permanent quest for perfection means that we think far beyond the concept of what constitutes the perfect coffee machine;
our history and experience ensures that we take an interest in anything that plays a role in preparing the best possible cup of espresso. We enjoy a lot passing on our knowledge and experience to others.

This is why we surround ourselves with people, projects and businesses where our enthusiasm and passion for the coffee culture, the enjoyment of coffee and the traditions of this product are shared.

The dc coffee education program actually includes the following courses:



Andrej Godina

ITALY

- coffee taster and expert, especially for espresso
- dc for him means: technology, family, friendship, quality, passion, experience

„To taste an espresso coffee is like a sensorial experience“

Fabrizio Sención Ramírez

MEXICO

- co-owner of cafesublime.org
- barista in his coffee shop called 5pm
- SCAE authorized trainer, master barista

„I´m always thinking in a coffee way“

Each dc coffee pro has dedicated his life to coffee. His identity, coffee knowledge and specialization makes him unique in the industry.

Sharing their passion and knowledge every dc coffee pro spreads our corporate mission to deliver high quality solutions for every coffee concept. For us, they are the best coffee people in the world.

Over time, this project creates a team of experts, in which all are united by mutual respect and the passion for coffee. A team that forms an excellent knowledge base of people who live coffee everyday, who are protagonists in the field, who like to share what they love and what they believe in.

As a company we have the possibility to profit from these highly skilled people. To share this deep knowledge with our customers, we provide the possibility to get in touch with the dc coffee pros. They can serve as a consultant to optimize every individual coffee concept.

James Olejnik (Jim)

GREAT BRITAIN

- quit his chef job to work full time at the Opposite Cafe in Leeds
- specialist barista for United and Coopers Coffee

dc: „Like cooking, coffee combines freshness, ratios, balance, service and experience. I like that a lot!"

Sevan Istanboulian

CANADA

- founded Mystique Coffee in 1998 to roast and promote specialty fair trade and organic coffees and teas

„dc: perfectionism at its best Coffee: common denominator to link and bond people from all over the world."

Kim Ossenblock

SPAIN

- 3rd place World Cup Tasters Championship 2012
- barista trainer and coffee consultant
- runs the specialty coffee blog www.baristakim.es
- developed the first online barista course in spanish
- dc: „The solution for baristas and barmen, to improve the espresso quality in coffee shops around the world."

„Every day coffee is a new tasting experience."

Troels Overdal Poulsen

DENMARK

- World Barista Champion 2005
- co-owner KONTRA Coffee Roastery
- dc: „Dalla Corte all together has a strong focus on making the benefits of new technology."

„Coffee is an instrument to fullfill a lot of needs"

Ingo Rogalla

SWITZERLAND

- 3rd place Swiss Barista Championship 2000
- Swiss Cup Tasting Champion 2009
- general importer Dalla Corte Switzerland
- owner of coffee- and barista-training center in Sempach, CH
- dc: „Dalla Corte is the most innovative company in the espresso machine business."

„In the morning I love filter coffee - I'm a German!"

dc campus

The dc campus is our international event to support the participants of the World Latte Art and World Coffee in Good Spirits Championships.
During the dc campus passion and knowledge of coffee people and the coffee industry come together in the context of live / learn / share:

/Living an unique experience together with the best international talents of this two disciplines.

/Learning by getting inspired through international baristas.

/Sharing each participant‘s passion and skills to improve the personal knowledge.

We are an espresso coffee machine producer.

As innovation driver we want to think beyond our business and be involved and inspired by the whole developments of the coffee world and it´s passionate coffee people. Only these people can help us to understand the sector´s needs and improve our products.
As sponsor of several high degree coffee events we follow our goal to be inspired and also inspire the whole coffee world.

World Latte Art Championship
The championship where milk foam artists challenge themselves with amazing patterns.

World Coffee in Good Spirits Championship
The championship where the worlds of drinks and coffee melt together to create unique combinations.

Let's Talk Coffee
The exhibition with workshop, discussions and field trips in south america.
