PHILIPS

Saeco is a trademark of the Philips Group

TRADITION MADE NEW. THE EVOLUTION.

Saeco has always been a pioneer in the OCS and small Ho.Re.Ca. locations market.

Today, thanks to its flair for development, to address the increasing needs of coffee consumption outside the home, the company created **Aulika** and **Lirika**, two coffee machines that express the best and most developed aspects of the OCS world.

Aulika is a perfect mix of tradition, innovation, design and technology, thanks to the synergies created between Saeco and Philips.

Lirika is the new entry-level reference point for OCS bean-to-cup, and guarantees superior performance and user-friendliness in a modern and compact shell.

DESIGNED FOR YOUR WORLD.

Saeco addresses the increasingly specific requirements of out-of-home consumption with two lines of machines that fully comply with customers' requests.

The need to be able to choose among different types of drinks, including fresh-milk-based specialties, the user-friendliness in self-service contexts, and the reduction of operating costs are only some of the requirements that Saeco addressed in designing **Aulika** and **Lirika**.

These two product lines were designed specifically for the B2B sector, and are equipped with revolutionary systems for the distribution of milk-based drinks, and have high capacity water and coffee canisters, a compact and innovative design and an operating software that was custom-made for the reference market, for better credit management, for instance.

In addition, Aulika and Lirika are 60335-2-75 certified for professional use, are energy efficiency class A rated and comply with the directives issued by FEA, the Swiss Sectorial Association for Power Appliances for households and industry.

THE MODELS

Milk from steam wand
2 coffee cups simultaneously
Hot water / steam wand
Single circuit

Cappuccinatore
Pannarello (optional)
Siluro (optional)

Ceramic blades

auLika

Aulika is the perfect combination of aesthetics and professional performance.

It has a clean, rational design and unparalleled technology: double hydraulic circuit, conical blades, and large water and coffee capacity (for the Aulika Top and Mid models).

All these characteristics make this machine perfect for locations with high daily consumptions.

All Aulika models deliver a wide range of coffee-based and fresh-milk-based beverages, as well as hot water and steam.

The wide graphic display can manage both icons and text messages in several languages.

The interface is equipped with 8 direct selection keys that make the machine easy to use and program.

The software architecture was designed by levels and content, thus making it possible to customise and manage credit / consumption fully. Cleaning and maintenance activities, too, are made easier by the fact that all components requiring regular checks can be removed.

The Top version is integrated by a base with extra capacity for grounds collection and can also be connected directly to the water supply.

Aulika is the Saeco range addressed at the most demanding out of home professionals.

www.aulika.com

A “PLUG AND PLAY“ REVOLUTION.

Aulika is equipped with “one touch“ logic, and automatically provides cappuccino and milk coffee, thanks to a special next generation cappuccinatore, the “Pinless Wonder“.

Pinless Wonder is a project originated in the Philips research laboratories and applied to Saeco products: this system, inserted in the machine nose, offers fresh-milk-based drinks of the highest quality and taste.

The milk froth and temperature are perfect, in terms of texture and consistency: these are the two essential factors that guarantee the brewing of excellent cappuccino and tasty milk coffee. In addition, milk frothing is always regular, with no “splash“ effect.

The patented Pinless Wonder technology is less sensitive to lack of or insufficient cleaning of the cappuccinatore, and maintains constant frothing performance even in the most demanding operating conditions.

Pinless Wonder is available only in the Aulika Top and Aulika Focus versions.

TOP QUALITY.

Saeco is striving to achieve maximum satisfaction for coffee-based drinks lovers.

Drink quality in the cup is constantly checked and monitored. For this reason, the various production stages of the Aulika Top and Focus models are characterised by continuous test and tastings, to ensure that the final product is the absolute best. Our in-house team of coffee experts carries out regular checks at the end of the assembly line, prior to packaging.

And the search for perfection does not end here: Saeco regularly requests the professionals of the Centro Studi Assaggiatori, the most advanced sensory evaluation unit in Italy, to test the products dispensed by the main machines against a very strict reference protocol.

The results are unanimous: Saeco has been recognized for the quality of the products, especially the milk coffee delivered by its machines, thanks to the perfect relationship between the milk frothing temperature and compactness of the resulting emulsion.

These results are a tribute to the excellence of the Saeco machines and guarantee best product quality.

AULIKA. A CLOSE LOOK.

Lirika

Lirika represents the simplicity, compactness and performance of a machine whose ideal environment is the office or small Ho.Re.Ca. locations.

It has a modern and essential design, high capacity water and coffee canisters and is incredibly easy to use.

Its wide display showing intuitive icons and text messages lets the user select short or long coffees and hot water or steam delivered through an independent wand.

Lirika represents the best Saeco know-how in a high quality compact shape: pre-infusion system, energy efficiency class A boiler, ceramic blades, and removable coffee brewing unit (with aroma adjustment in the Plus version) to facilitate cleaning and maintenance operations.

The Lirika Plus version, thanks to the "pannarello", prepares particularly creamy and tasty cappuccinos and milk coffees.

SIMPLICITY MEETS QUALITY.

Lirika is equipped with a user-friendly, intuitive professional interface.

It has a dot matrix display that send clear messages with icons and colours.

The machine uses a traffic-light colour code system: green means ok, yellow is used for warnings or to show what to do, red is for alarms or machine restart operations.

Moreover, the machine always shows a progress bar for the current activity, so that the user is aware of the status of the request.

LIRIKA. A CLOSE LOOK.

Height-adjustable coffee spout (2 positions)

Adjustable coffee aroma (Plus version)

3 colours graphic display with icons

ACCESSORIES

Astra

Compressor refrigerator Astra to keep milk fresh, with a capacity of 4 litres. It can be combined with both Aulika (Focus version excluded) and Lirika models.

Technical data

Dimensions (w x h x d)	225 x 340 x 467 mm
Weight	11 kg
Power supply	220-230V/50-60 Hz
Power consumption	96 W
Capacity	4 l
Refrigerating unit	compressor

Milk Cooler

Milk Cooler to keep milk fresh, with a capacity of 1 litre. The cooling is generated by a Peltier cooling system with no CFCs.

Technical data

Dimensions (w x h x d)	150 x 215 x 190 mm
Weight	1.7 kg
Power supply	100-240V/50-60 Hz
Power consumption	20 W
Capacity	1 l

ACCESSORIES

Aulika Mid Base

Painted metal and ABS matt black base, in family feeling with Aulika Mid, with 2 drawers for sugar bags, stirrers etc.
Its use with the machine is suggested if the Astra refrigerator or Milk Cooler are present.

Lirika Siluro Cappuccinatore

Stainless steel Siluro cappuccinatore, to be mounted on the steam wand for the frothing of creamy cappuccinos and milk drinks.
It can be used also in combination with the Milk Cooler.

SOLUTIONS THAT MEET YOUR EXPECTATIONS.

For several years now Saeco has been developing its projects in partnership with important players in the world of coffee brewing outside the home.

The willingness of the company to address the needs of the market and of the users more and more closely has led to the development of customised solutions. Moreover, the company supports its products throughout the development and sales phases and beyond, thanks to its solid after-sales service.

Saeco has also a dedicated team and a set of on-line and off-line tools to support the customer on a daily basis, in terms of information, technical skills, spare parts and accessories.

Saeco, your ideal partner.
