

Steel SE 200

Description

Steel SE 200 is a professional electronic machine with two groups, equipped with electronic pre-brewing and electronic adjustable servings.

Created to satisfy every professional requirement, Steel SE 200 is an embodiment of the high-quality technology Saeco is famous for.

Main features

- Autonomously pre-heated brewing group with adjustable temperature maintains the perfect temperature for any sort of coffee beans independent of how long the machine has not been used
- Double pre-brewing system: mechanical only, or mechanical and electronic
- Top boiler capacity – one of the highest available
- Main switch with 3 positions – full power, reduced power and energy saving mode for electric heating
- Teflon-coated volumetric meter and cold nozzle with T.E.A. treatment to prevent lime scale

Accessories

- Water softener

Technical data**Steel SE 200****Structural specifications**

Dimensions (w x h x d)	625 x 472 x 510 mm
Weight	49 kg
Framework material	tropicalized steel
Housing material	stainless steel/painted steel

Electrical specifications

Power supply	230-240 V /50-60 Hz - 400-415 V /50-60 Hz 3N~
Electric heating at maximum power	5000 - 4500 W
Electric heating at reduced power	3500 - 3000 W

Water specifications

Boiler capacity	13 l
Boiler material	copper
Independent heat exchangers tied to boiler	2
Autonomously heated chrome-brass units	2
Stainless steel articulated steam wand	1
Stainless steel hot water wand	1
Pressure gauge for boiler and pump	1
Boiler automatic filling	•
Internal balanced motor pump	1
Anti-eddy device (fitted in boiler)	•

Water connections

Water supply	water-supply
Water connection	3/8" (1-8 bar)
Water softener	optional

Other specifications

Electronic pre-brewing	•
Coffee cup electronic adjustment	•
Pods kit	•
Number of selections	10

Performances

Steam production/hour	6.9 kg
Hot water production/hour (150 cc cup)	300
Coffee preparations/hour (30 cc cup in 25-30")	300

CE approved
